Awesome Presence, Outstanding Performance

Plantation

48" WOOD BURNING FIREPLACE

What just may be the perfect manufactured fireplace, the new Plantation from Fmi is the new flagship of the Grand Masters Series. 48" wide with an astounding 42" tall opening and slanted back is perhaps even more impressive, the hearth floor only 1 1/2 inches above the floor; just like the highest quality traditional masonry masterpieces. It's the latest *Vesta Award* winner in Fmi's exciting line of hearth products featuring Mosaic Masonry™ firebrick liners...and a host of other beautiful new features homeowners will love!

Homeowner Highlights:

■ **Dominating Presence** — The Plantation is a dominant feature in any home. It's nearly 12" taller than the nearest contender, with real terracotta tone firebrick in a new "split" herringbone pattern.

■ **Masonry Firebrick liner** — The Mosaic Masonry™ firebrick lining system positions Fmi's Grand Masters Series as the industry's only real masonry, factory built and UL 127 lab certified fireplaces! The beautiful kiln-fired clay firebrick kit is indistinguishable from site-built masonry.

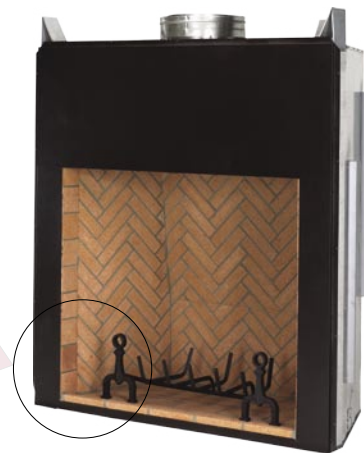

■ **Efficiency and performance**—The Plantation also features a real masonry style damper door and smoke closet, and vent with 12" double wall pipe. The fireplace is among the most reliable, highest performing models available.

Builder Benefits:

■ **Masonry Firebrick Liner**— The patented Mosaic Masonry™ kit is a complete, easy to install masonry system with factory installed templates, precut and labeled bricks, and even a bag of hi-temp mortar to grout the finished fireplace.

■ **Reliability and Versatility**—On top of the authentic, site-built masonry appearance, the Plantation is a UL 127 lab tested and certified "zero clearance" fireplace. This means flexible and reliable installation options and guaranteed performance.

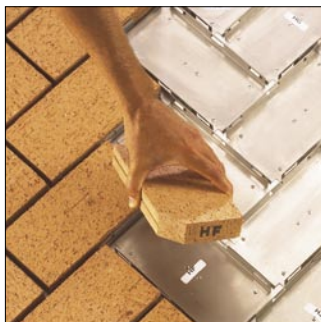

■ **Unparalleled value**—Hand crafted masonry finished fireplace at a fraction of the cost and installation time of site-built; with factory controlled quality, and performance.

The F48H model features rich, "split" herringbone brick pattern. The dramatic 48" x 42" opening is easily the largest in the industry. It's also the only woodburning fireplace featuring a flush hearth floor design.
